PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in AI & Data Science, with strength in Data Structures, Algorithms, Object-Oriented Design (OOD), and automated testing. Thrives in fast-paced, ambiguous problem spaces as a self-starter. Experienced in building custom CRM platforms, scalable distributed backend APIs, and production-grade software solutions.

TECHNICAL SKILLS

Programming Languages: Java, C, Python, SQL, JavaScript

CS Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Design (OOD), Complexity Analysis, Relational Database Concepts, Web Architecture

Web Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, REST APIs

Databases & Security: SQL, MySQL, MongoDB, Row-Level Security (RLS)

Tools, Testing & Cloud: AWS, Docker, Automated Testing, Git, GitHub, Linux CLI, System Monitoring

PROJECTS

IOMS Core – Custom In-House CRM Platform | *Next.js, React.js, Tailwind CSS, MySQL, RLS*

- Architected an in-house Customer Relationship Management (CRM) platform to streamline client pipelines, operational telemetry, and project workflows.
- Reinforced database security and multi-tenant data isolation using MySQL with Row-Level Security (RLS) policies.
- Designed a high-throughput, responsive web application applying Object-Oriented Design principles and clean web architecture.

SMS Fraud Detection with Explainable AI | *Python, Scikit-learn, LangChain, Machine Learning*

- Developed an automated classification platform utilizing Python and TF-IDF feature extraction pipelines.
- Integrated LangChain explainability layer to render actionable analytical outputs for flagged security threats.
- Conducted automated testing, structural data debugging, and preprocessing optimizations to ensure system stability.

Customer Review Data Mining & Sentiment Pipeline | *Python, NLP, Scikit-learn, Text Processing*

- Built an end-to-end data processing framework for analyzing unstructured enterprise-level textual datasets.
- Executed comprehensive feature engineering, algorithm complexity optimizations, and model performance evaluations.

EXPERIENCE

Data & Systems Advisor | *HillSafe Startup*

Feb 2025 – Jan 2026

- Architected a real-time environmental monitoring platform using Python for low-latency IoT sensor stream processing.
- Designed secure backend APIs and implemented highly efficient data processing modules.
- Built predictive machine learning pipelines to optimize real-time alert precision and overall system reliability.

Research Contributor – Predictive Analytics | *IIT Tirupati*

Jan 2025 – Present

- Implemented deep learning and graph neural network configurations engineered for molecular property predictions.
- Contributed to structural feature engineering, source data preprocessing, system debugging, and execution speed tuning.
- Collaborated closely on foundational technical experimentation pipelines supporting active peer-reviewed publications.

EDUCATION

B.Tech in Computer Science Engineering (AI & Data Science)

Expected May 2027

KL University, Hyderabad

CGPA: 9.1/10

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Software Engineering, Software Testing, Operating Systems, Computer Networks, Cloud Computing, Web Architecture

CERTIFICATIONS & LEADERSHIP

- **President, Entrepreneurship Development Cell (EDC):** Led a 40+ member team hosting technical hackathons and workshops for 300+ developers.
- **Certifications:** AWS Cloud Foundations | MongoDB Associate Python Developer | NVIDIA Agentic AI & RAG Agents — Red Hat Application Development I.
- **Hackathon Finalist:** Red Hat Collaborative Hackathon (Top 10% out of 70+ engineering teams).
- IEEE Member – Conducted Web Development Workshop for 400+ students
- Invited Speaker – Python Workshop, KL University
- Campus Ambassador – IIT Bombay E-Cell
- English Proficiency – B2
